

Pattern: Lava Rock #529

VERTI-CRETE FORMLINERS

Key Features

Centuries of volcanic activity, rainfall and erosion have created this unique Lava Rock texture. The rich history and timeless beauty of Lava Rock perpetuates the essence of Hawaii.

This naturally course texture has a 1 ¼" depth of relief to help it capture the stone's organic variance. The largest stone face has a diameter of 23" and an average stone diameter of approximately 12". Smaller stones fill in the gaps in between to balance the pattern.

Available in 4' by 8' sheets this polyurethane reusable liner features "through-stones" on each edge so as to continue the pattern as liners are fit together.

Specifications

Maximum relief:	1 ¼"
Liner Total Thickness: (Plywood Backed)	2 ¼"
Maximum Part Size	48" w x 96" h
Max Stone Diameter:	23"
Average Stone Diameter:	12"
